About Us

Likewise other companies **Welcome to their customers and partners we "Hari Kranti"** call it as an opportunity of satisfied growth! You are stepping into a family where your experience will be different from other organizations. Hari Kranti is predominately sharing the vision of Indian Agriculture & World Health Organization to control & eradicate the critical trouble called "Hidden Hunger Syndrome" in developing nations caused by deficiency of micronutrients in the soil while bringing cracks in the environment due to poor farming methods. This particular health problem was addressed at a global level in various forums and overstretched the people to consider this issue in depth and to struggle with it. Soil Care Organics environmentalists has overviewed and studied this subject in detail and formulate its plan to revitalize the soil that is critically affected by the ordinary & conservative farming practices. With the under-nourished soil the crop production is less as well as poor in nutrients together with its return to farmer with seepage in the environment. Altogether these three factors impress the health to a lower degree and become the reasons of many diseases and even death.

Hari Kranti will combat this dignified & degenerated health & environment issue with their marked team, committed leadership skills, by capturing worldwide farming community and their associates, common citizen attention on our enhanced Healthy Farming methods while relaying our policy in detail to practice this farming for sustainable growth of their nutritious crop, income while widening the scope to recover the environment damage.
